MH° Centigrade

the cool way forward

Delivering Healthcare Solutions Worldwide

Introducing MH° Centigrade

MH° Centigrade is targeted to improve the performance and meet the logistical needs of temperature-sensitive goods.

MH° Centigrade enables goods to be stored inside certified containers which can be carried on board most common aircraft types to ensure seamless handling.

MH° Centigrade is MASkargo's flagship cold chain product which promises temperature-sensitive shipments are actively monitored to ensure the recommended temperature is regulated throughout the journey.

Benefits For You

MH° Centigrade provides numerous benefits to suppliers, freight forwarders and retailers.

- Vast network coverage.
- Temperature controlled cargo compartments depending on aircraft types.
- Specialized handling to minimize external exposure, particularly during transit.
- Insulated containers to protect goods and maintain product temperature.
- 24/7 specialized Customer Support

A Seamless Service

MH° Centigrade offers your cargo an experienced team of personnel and advanced technological equipments, dedicated to monitor and ensure your goods maintain an unbroken chain of coolness.

ACTIVE Cooling Technology ~ A premium selection of carefully designed containers tailored to maintain an accurate and constant cool temperature of -20°C or +25°C throughout the entire journey. The cool way forward to transport pharmaceuticals, biologics products and exclusive perishables.

PASSIVE Cooling Technology ~ Designed to suit the transportation of temperature-sensitve shipments that are pre-packaged to maintain the desired product temperatures and requires passive temperature management features.
